FUCHSIAS

THREE OF OUR OWN INTRODUCTIONS - 75¢ each plus postage

POWDERPUFF (56) Double. Basket type. Slow growing, extremely bushy. Green to white buds with touch of pink on medium long tube. Opens very wide with a great many rather short pale pink petals to resemble a lady's powder puff. Prolific bloomer.

SNOWPUFF (56) Double. Basket or pot type. More bushy than Swingtime which it resembles in flower except sepals are a deeper red and the white petals are flushed with pink at the base. Prolific bloomer.

JUNGLE NIGHT (55) Double. Basket type. Tends to grow rather upright in early Spring, due partly to its extremely thick bushy growth whereby the many stems tend to hold each other up. Bend and weight this new growth over for a week and the weight of the buds and flowers will bring the plant down for a good basket. Sepals red, petals very dark purple, flowers flared as in Mission Bells.

TERMS

All sales are cash with order, no C.O.D. orders accepted.

Orders cannot be accepted for less than \$3.00 (value of plants only before adding postage.)

We do not sell unrooted or rooted cuttings but only plants that have been well grown and established in pots. We pack these plants without the pots to conserve weight. Our plants are specially grown for shipment but after being shipped we have no control over them and cannot accept any responsibility for damage or loss either in shipment or after delivery.

The plants we are offering are newer varieties and some are so new that we have the only supply available anywhere, and in some instances our stock plants are also limited. Orders are filled in order received and even when we can't ship because of weather conditions, requests will be reserved in order received. Therefore the earlier the order the better the chance of our shipping you what you select.

We do not charge for packing.

We ship Insured Parcel Post, Special Handling.
